INTRODUCING OUR CARBON FOOTPRINT CALCULATOR

ISO 14067

Environmental action from public and private sectors will gather momentum in 2025 and beyond. Many institutions have set ambitious NET ZERO targets in the near future. The first step to NET ZERO is measuring your carbon footprint, which is difficult in a world of complex supply chains and unreliable data / claims.

In partnership with **ecoact** - a world leading French environmental consultancy, we have developed an industry-first carbon footprint calculator (named On Track) to report the impact of most of our products reliably. By assessing our entire supply chain—from raw materials to end-of-life—we provide reliable carbon footprint data in kgs of CO2 equivalent terms. Our tool is ISO-14067 certified by Bureau Veritas, ensuring accuracy and credibility in our data.

How It Works | ecoact

Using Life Cycle Assessment (LCA) methodology to assess the full environmental impact of a product going from extraction, transformation, production, packing, shipping, and use to end of life.

This award reduced **30%** carbon emission compared to a traditional award.

Our CHANGE ZERO collection products are funding ClimatePartner's renewable energy projects across Asia, primarily in solar and wind energy.

Small Bottle. BIG IMPACT.

Each Ocean Bottle purchased funds the collection of 1000 plastic bottles entering the ocean. That's 11.368kgs of plastic. You can make an impact on ocean plastic today! The funds from the purchase of an Ocean Bottle go towards local communities living near plastic waste streams, who are paid Fairtrade International wages for the collection of ocean-bound plastic. This is all made possible with the help of Plastic Bank and powered by a traceable IBM blockchain verified plastic collection system. The double wall insulation keeps your cold drinks cold and your hot drinks hot. Designed with a dual opening function the leak proof lid gives you the option to sip from the spout and the base and provides easy access for filling, cleaning and adding ice.

BIO BOTTLES MADE IN THE NETHERLANDS

Tacx

BIO BOTTLES MADE IN THE NETHERLANDS

Tacx Are you looking for a bottle fully made of biodegradable materials? Then the Bio-Bottle of Tacx is a great choice. It stands out because the plastic of the bottle is biodegradable. Adding a small amount of bio-material changes the molecular structure so the material finally breaks up in biogas and biomass. This feeds the soil and it's completely absorbed by nature. The process of disintegration starts when the bottle ends up at a microbiological environment (compost heap, waste disposal).

Traditional wooden pencils write only up to around 200 metres, but this bamboo eternity pencil, has a writing length of up to around 20,000 metres using a graphite tip to produce a graphite line. Not only does it write like a pencil, but the markings can be erased. It works by leaving a graphite line on paper just like a regular traditional wooden pencil but it wears down so slowly, that it should outlast up to 100 traditional wooden pencils!
